

ePIC PAPER

v0.2

SPRINT is a set of tokens made to address the huge appetite and demand from people trying to make quick cash and exit.

Sprint also addresses the frequent challenges with pump and dump tokens as well as honey pots and rug pulls, too many investors lose money.

With Sprint, the investment process and activities surrounding it will be coordinated, in a clean and clear manner. Investors will be on the same page concerning the timeline of events leading to the end of life of the token.

There will be a **7 day's life span** per Sprint token launched if not agreed by community. Tokens will be tagged as Sprint101, Sprint102, 103.....104

In total there will be **10 versions** of Sprint tokens **per ePic** and all versions can be found and Tracked on telegram and website. Investors will have information which token is the right one, which one is active and which one is completed.

The goal of these tokens are simple

1. Invest
2. Make profit
3. Charity & Donations
4. Exit

Repeat 😊

We came up with a flow where most investors make money, except the ones who were not active or didn't do proper research. The combination of activities includes: strategic taxes, short, fast pace growth, sprint boost, massive marketing, consistency and enough time for investors to exit.

Taxes on trades will be as follow or otherwise specified by community

Day 1: 70 percent

Day 2: 60 percent

Day 3: 50 percent

Day 4: 40 percent

Day 5: 30 percent

Day 6: 20 percent

Day 7: 10 percent

The general flow of token lifetime will be:

1. creation
2. presale
3. launch
4. 6 days and 23 hours sprint time
5. End of sprint token

For the first sprint

There will be a tiny dev and marketing wallet not greater than 5% of total coin supply

During the presale phase

Liquidity will be locked: Liquidity will be locked until the end of the sprint (7 days)
70% Liquidity from presale funds raised. Liquidity will be on pancakeSwap unless otherwise agreed with the community.

At the end of the sprint

Liquidity unlocks and all sprint token left will be burnt

Remaining pair tokens will be splitted as follows

- 10% to charity, investors vote to decide.
- 50% sent to the marketing wallet and used for the next sprint promotion and sprint boost event.
- 10% donated to any public project, the dev team decides and the result will be made public.
- 10% split in two with half going to the top 10 most active investors voted by other community members while the other half will be used to fund community giveaways and rewards.
- 20% sent to a dedicated dev wallet to fund development activities.

Sprint Retro

An activity that happens at the end of the sprint time. Community members and investors will vote to determine the resolutions of topics arising from sprint, examples include where to send donations, which members where the most active as well as suggest ideas what could be improved in the next sprint

Sprint Planning

An activity that happens at the start of the sprint. Community members and investors will vote to determine the percentage to set for taxes, how long to keep presale, how many tokens to offer and soft / hard cap of presale as well as what percentage goes to marketing, active investors, dev wallet etc at the end when liquidity is unlocked.

Trading sprint tokens

After presale, tokens will be available per sprint on pancakeSwap. Investors are encouraged to use Dodo DEX, boggedFinance platform for sell trades due to high tax requirements.

SPRINT101

Contract - 0x9150D574ec1256d863F02d28F65CDae61Bf4F3ee

All other wallets will be taxed based on daily tax rates for sell orders. Wallets will not be listed in this paper due to privacy concerns.

SPRINT 101 Retro

The sprint started with necessary marketing and followed the default sprint timelines as specified on the website. After the marketing round followed the presale process with additional marketing. Link to the presale provided: <https://dxsale.app/app/pages/defipresale?saleID=2567&chain=BSC>. At the end of the presale, Less than 6 BNB was raised signaling a failed presale. Some of the challenges identified for not meeting the soft or hard cap included low contribution from investors and lack of trust as the Sprint community is still new.

It was decided to try the following for next sprint:

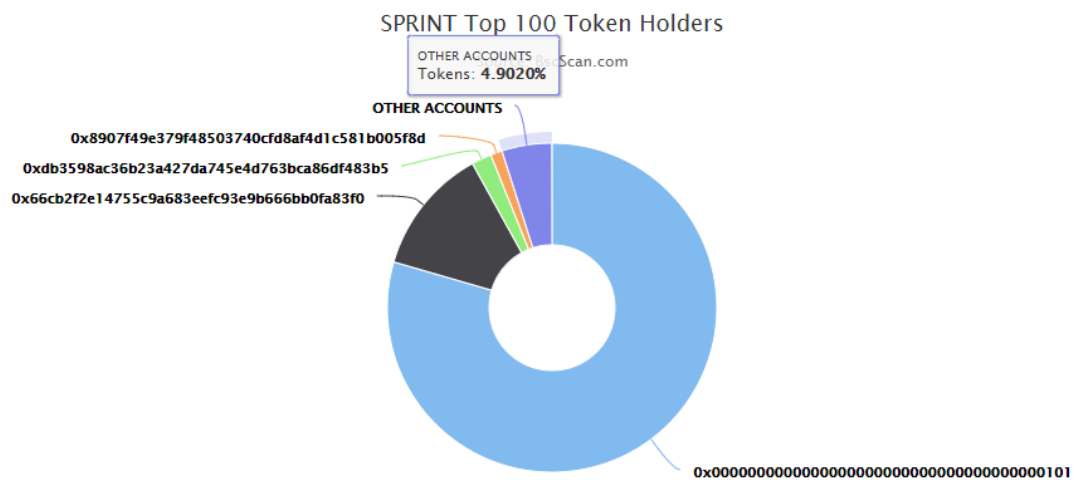

- Reduce soft and hard cap
- Increase marketing and awareness
- hold AMA outside Sprint community

SPRINT102

Contract - 0x9150D574ec1256d863F02d28F65CDae61Bf4F3ee
